Education

MS **Vrije Universiteit Amsterdam**, Artificial Intelligence — Sept 2023 – March 2025
BS **University of Milan-Bicocca**, Computer Science — Sept 2019 – March 2023

Publications

Testing Emergent Bilateral Symmetry in Evolvable Robots with Vision — November 2024

Michele Vannucci, Satchit Chatterji, Babak H. Kargar

DOI: 10.5220/0012947400003837

- Received an **honorable mention** for the best paper award of ECTA 2024.
- For this project, I implemented in Python vision capabilities for **evolvable robots**, leveraging the pre-existing simulation framework Revolve. Furthermore, I wrote and ran the logic for the experiments. Finally, I contributed mainly to the background, methods, discussion and appendix sections of the final paper.

Projects

Master's Thesis — PDF

- I wrote my Master's thesis with Peter Bloem about an **AIXI** agent which performs surprise minimization with respect to incoming observations.

Master's Projects — github.com/michelexyz

- Worthy of note are the **Reinforcement Learning**, **NLP**, **Knowledge Representation** and **Deep Learning** projects.
- Moreover, for the Machine Learning for Graphs course I **reproduced and extended** an existing research paper on **causal discovery**.

Internships/Jobs

Vrije Universiteit Amsterdam, Teaching Assistant in Deep Learning (Master's course) — Amsterdam, NL, October 2025 – January 2026

- I held practical sessions to support students with their assignments.
- I graded the submissions, helped developing the grading guide, and wrote a few exam questions.

Digital360, AI Specialist — Milan, IT, April 2023 – July 2023

- Tested the writing quality of different LLMs generating, through their APIs, titles, summaries, tags and other elements of a Web article. I automated the compilation of all the generated texts, along with the prompts, models and articles used (summing up to around 300 combinations), in a tabular format to be reviewed by experts in Web article writing.
- Developed a Python program to generate a new article draft from a White-Paper PDF by **chaining multiple LLM calls**, which was later developed into a product.

Languages

Programming Languages: Proficient in Python, C#, C, Java, SQL, JavaScript, Lisp and Prolog.

Natural Languages: Bilingual in Italian (native) and English (fluent). I know basic Dutch and French.

Interests

I really like going to the **cinema**, I write and produce **music** as a hobby and I also enjoy **reading** when I find the time. Currently I'm reading *Siddharta* by Hermann Hesse and *Gödel, Escher, Bach: An Eternal Golden Braid* by Douglas R. Hofstadter.
